

iLidClean®

iLidClean® is available in two distinct versions to suit different lid hygiene needs:

- iLidClean® (blue) is more flexible, ideal for gentle cleaning.
- iLidClean® II (purple) features a sturdier handle, designed for more targeted and precise cleaning.

Both versions safely and effectively remove lid margin debris – including mascara residue and bacterial biofilm. Their soft silicone design with micro-nubs is gentle enough for daily use and compatible with approved lid margin cleansing products. They're also reusable, easy to clean, and come in convenient storage containers to keep your routine simple and sanitary. Get the clean, healthy lid margin environment you need with iLidClean®.

Key benefits iLidClean®
